**LED Silicone Watch  
Operation Manual (Model 03228)**

**Features:** 1. Time display: Hour, minute  
2. Date display: Month, day

**Time & Date Display:**

1. Tap the watch face to display the time.
  - a. The hour will be shown at the top
  - b. The minute will be shown at the bottom
2. When the time is displayed, tap the face again to display the date (two lights in the lower left corner of the grid on the upper left side of the watch face will be lit when the date is displayed, to distinguish date display from time display)
  - a. The month will be shown at the top
  - b. The day will be shown at the bottom
3. The display will shut off after about 3 seconds, to conserve the battery.

**Time & Date Setting:**

1. Touch the watch face to display the time.
2. While the time is displayed, tap the face 6 times (the display will switch between time and date display each time you tap the face), long-pressing on the 6th tap until the 'hour' lights start to blink.
  - a. While the hour lights are blinking, tap the face until it displays the current hour. Then wait until the 'minute' lights begin to blink.
  - b. While the 'minute' lights blink, tap the face until it displays the current minute. Then wait until the 'month' lights begin to blink.
  - c. While the 'month' lights blink, tap the face until it displays the current month. Then wait until the 'day' lights begin to blink.
  - d. While the 'day' lights blink, tap the face until it displays the current day. Then wait until the display turns off, and all settings will be saved.

**Battery:** Lithium CR2032, 3.0 V (included).

**WARNING:**  
**DO NOT DISPOSE OF BATTERY IN FIRE.**  
**BATTERY MAY EXPLODE OR LEAK.**
