

VD76 INSTRUCTION MANUAL

Time and Date Setting:

[IMPORTANT NOTICE: Do not set the date when the time displayed is between 10:00 PM and 1:00 AM. Doing so may affect the day setting. If you need to set the date during that time period, first set the watch to a time outside that period, then set the date, and then reset to the correct time.]

- When the second-hand is at the 12:00 (60 second) position, pull the crown out to the second click. Rotate the crown clockwise to set the time and the day.
- When you have selected the correct time and day, push the crown back in.
- To set the date, pull the crown out to the first click. Rotate the crown counterclockwise to set the date.
- When you have selected the correct date, push the crown back in.
